

SAC Sailplane Handicap Addendum

18-Feb-10

Notes:

1. In certain cases, the SAC/SSA Handicap List may omit factory sailplanes that fly in Canadian competitions. Also, Canadian sailplanes registered as "Amateur Built - CAR Standard 549" are unique in their performance as a result of variations in construction, modifications and fitment. Therefore, for competition scoring, each such aircraft must have a specific assigned handicap value.
2. A reasonable effort is made by the SAC Sporting Committee to assign, from observed and/or recorded flight data, the performance of a unique sailplane with respect to the SAC/SSA Handicap List.
3. The assigned handicap value for a unique sailplane is considered valid until a new list is published.
4. Requests for the addition of aircraft to the list may be submitted to any member of the SAC Sporting Committee at any time. Additions will be expedited.
5. Requests for review of current handicap values should be submitted to the SAC Sporting Committee with supporting evidence/arguments. Handicap reviews will normally be conducted after the close of the active soaring season.

Manufacturer	Model	Registration	Span	Handicap	Date
Schleicher	ASW-28-18		18	0.88	
Nowak	Egret	C-GFQM	18	0.93	17-Feb-10
Schreder	HP-18H	C-FQCC	15	0.93
